

## Our Mission

At Critter Doctor, our mission is to offer you the highest quality care for your pet—the same care that you would wish for yourself and your human family.

## Scheduling

Wellness Testing can be scheduled at any time. If we have already seen your pet within the past year, the Wellness Package also includes a complete physical examination at no charge.

## Why Wellness

We want to keep your pet happy and healthy for years to come. That's why we recommend Wellness Testing for every pet, regardless of age.

For older pets, we check for kidney disease, urinary tract infections, and changes in thyroid health, to name a few issues. Early detection of problems is key for treatment and long-term management.

But Wellness Testing isn't just for older pets! A small number of younger patients have blood abnormalities present from birth. Again, early detection is important in identifying a treatable or chronic condition.

Also, should your pet ever be-

come sick, having a baseline can help doctors better understand and treat your pet's illness.

### **Pets Under 9 Years\*—\$100 (Regularly \$196.25)**

**BLOOD TESTS:** For our younger pets, the Wellness Package includes a full Chemistry & CBC (Complete Blood Count) panel. This provides white & red blood cell counts, liver & kidney function values, and blood sugar & protein levels.

**URINALYSIS:** Testing urine checks for infections and assesses kidney function and overall bladder health.

### **Pets 9 Years and Older\*—\$150 (Regularly \$256.75)**

**BLOOD TESTS:** For our older pets, the Wellness Package includes a more extensive blood panel: Chemistry & CBC panels assess white & red cell counts and liver & kidney function. We also check thyroid levels, electrolytes, protein and blood sugar levels.

**URINALYSIS:** Testing urine checks for infections and assesses kidney function and overall bladder health.

**\*Wellness tests are for pets not currently showing clinical signs of illness or injury**
